Project No.: 0172.00.005.510		NATSRAT DISTRIBUTION Page <u>1</u> of <u>1</u>
Project Name: National Strategy RSEI Report		
Date: 5-19-03	Time: 11:00 a.m.	
Company Name: Metallurgical Products Contact Name: Greg Kudlodzić Phone No.: 610-696-9230		
Name: Ellie Coddling		Eastern Research Group, Inc.
GENERAL SUBJECT : Metallurgical Products TRI Reported Release of Elemental Phosphorus		

TOPICS DISCUSSED AND ACTION TAKEN

I spoke with this Greg morning. He is the plant manager and tried to answer my questions.

E: Does Metallurgical discharge phosphorus to surface water?

G: Metallurgical melts elemental yellow phosphorus, so they have some air releases and some transferred to water. A consultant does his reporting and permitting. They have no water discharges from their site.

E: What is his NPDES permit for and why did they report water discharges in TRI?

G: He isn't sure, except he said maybe it was for stormwater.

E: Do you have air pollution control?

G: Yes, but it is dry. So he thinks it is the stormwater discharge they're reporting.

E: Do they store their products or raw materials outside

G: Only under cover

E: Is the phosphorus reported truly phosphorus or is it phosphates or phosphoric acid reported as phosphorus?

G: That is exactly what the consultants are doing.
